

ASWIN E N

Full Stack Developer

Bengaluru, India | 8590108110 | enaswin17@gmail.com

GitHub: github.com/aswinen-17 | LinkedIn: linkedin.com/in/aswin-e-n-6a9411253 | Portfolio: portfolio-k7gw.onrender.com

PROFESSIONAL SUMMARY

MCA graduate and Full Stack Developer with hands-on experience building web applications using React.js, Next.js, Node.js, Express.js, PostgreSQL, and MongoDB. Experienced in developing REST APIs, authentication systems, database integrations, third-party API integrations, asynchronous workflows, and responsive user interfaces. Strong foundation in JavaScript, Java, OOP, Data Structures & Algorithms, Git/GitHub, debugging, and software development practices.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Java

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, JSON

Databases: PostgreSQL, MongoDB, MySQL

AI & APIs: Gemini API, AI API Integration

Core CS: OOP, Data Structures & Algorithms, SDLC

Tools & Deployment: Git, GitHub, Postman, Thunder Client, VS Code, Vercel, Render

EXPERIENCE

Software Development Intern — CodeCraft InfoTech

Aug 2026 – Sept 2026 | Bengaluru, India

- Developed and delivered software projects with a focus on responsive, interactive, and user-friendly interfaces.
- Implemented functional features including user input handling, validation, dynamic components, and responsive layouts.
- Managed project development and deployments while maintaining organized and accessible project repositories.

PROJECTS

AI Finance Platform — Personal Finance Management Web App

Next.js | Node.js | Prisma | PostgreSQL/Supabase | Clerk/Auth.js | Tailwind CSS | Gemini API

- Developed a full-stack personal finance application for income and expense tracking, recurring transactions, spending dashboards, and budget management.
- Integrated Gemini AI APIs for receipt and bill scanning, extracting and categorizing transaction information through asynchronous REST/JSON workflows.
- Implemented authentication and protected user-specific routes using Clerk/Auth.js with session-management practices.

QuickShow — Movie Ticket Booking Platform

React.js | Node.js | Express.js | MongoDB | Clerk | Stripe | Inngeist | Brevo/Nodemailer | Vercel

- Developed an end-to-end movie ticket booking platform supporting movie discovery, show details, seat selection, payments, bookings, and administration.
- Implemented temporary seat reservation with retry logic and automatic release after 10 minutes, handling asynchronous workflows and booking edge cases.
- Built an administrative dashboard for managing movies, shows, users, and bookings.

QuickAi — Full-Stack AI SaaS Application

React.js | Node.js | Express.js | PostgreSQL | Clerk | Tailwind CSS | Gemini AI

- Built a full-stack AI SaaS application covering database design, backend services, REST APIs, authentication, and responsive frontend UI.
- Integrated AI capabilities for article generation, blog title generation, image generation, background removal, object removal, and resume analysis.
- Implemented secure sign-in/sign-up, profile management, and premium subscription billing using Clerk.

EDUCATION

Master of Computer Applications (MCA)

Bangalore University | CGPA: 7.4/10

2023 – 2025

Bachelor of Computer Applications (BCA)

University of Calicut | CGPA: 7.2/10

2019 – 2022

CERTIFICATION

Cloud Computing & AI with Python — National Institute of Computer Education (NICT)

April–May 2025
